

JOAQUIN HARO FILIPPON

Salesforce Platform Associate | CRM Data, Reporting & Automation

Argentina | +54 9 2945 699379 | joaquinharofilippon@gmail.com | LinkedIn | GitHub | Trailblazer

PROFESSIONAL SUMMARY

Salesforce Platform Associate with one year of hands-on experience building CRM systems across admin and developer tracks. Delivered Salesforce implementations for real clients, maintained platform data integrity in a production environment, and built the reporting and documentation infrastructure teams actually use. Strong foundation in Flows, custom object architecture, SOQL, reports, and dashboards. Comfortable with modern AI tools. Ready to own a CRM org from the ground up.

CERTIFICATIONS

- Salesforce Certified Associate
- Marketing Cloud Essentials – Level 1, Orange Academy
- Marketing Cloud Essentials – Level 2, Orange Academy

TECHNICAL SKILLS

Salesforce Platform: Custom Objects & Fields, Page Layouts, Flows, Process Automation, Validation Rules, Reports, Dashboards, User Management, Profiles, Permission Sets, SOQL, Translations & Localization, Chatter

CRM Data & Revenue Operations: CRM Data Quality, Record Correction, Data Management, Segmentation Support, Systems Documentation, Stakeholder Communication

Tools & Methodologies: GitHub, Visual Studio Code, Agile / Scrum, Trello, Modern AI Tools

Web & Marketing Cloud: HTML, CSS3, JavaScript, Bootstrap | Email Studio, Journey Builder, Email Templates

SALESFORCE PROJECTS

Salesforce Implementation Project | **CloudConsulting** | *Bootcamp* | Apr – May 2023

- Delivered a project management application on Salesforce for a real client, consolidating data from multiple source systems into a single org with a clean object model and automated tracking.
- Configured custom objects, fields, page layouts, Flows, reports, and dashboards to support end-to-end project visibility across the client team.
- Worked in a 3-person Scrum team running 2-week sprints, shipping the full implementation within a 6-week delivery window.

E-Learning Platform | **Salesforce Configuration Project** | *Bootcamp* | Apr 2023

- Designed and configured a Salesforce-based e-learning org for students and teachers, modeling course, enrollment, and user data from scratch across custom objects.
- Built Profile and Permission Set architecture to enforce role-based access across student and teacher tiers, with no overlap between roles.
- Built progress-tracking dashboards and validation rules that enforced data integrity across all platform records.

PROFESSIONAL EXPERIENCE

Salesforce Administrator | **InCompany** | *Remote* | Nov 2025 – May 2026

- Audited and corrected record data across multiple Salesforce objects, resolving field inconsistencies and duplicate entries to restore data integrity for production reporting.

- Designed and deployed custom objects and fields to model quoting and operational workflows, enabling structured data capture that did not exist in the org before.
- Restructured Account page layouts for sales and ops teams, grouping fields by workflow stage and surfacing critical data earlier in the view, reducing navigation friction in daily use.
- Wrote end-to-end documentation for a production quoting system, giving non-technical teams a standalone reference that reduced dependence on developer support for day-to-day operations.
- Executed complete metadata localization into Spanish across custom labels, field names, and UI components throughout the org.
- Ran requirements sessions with sales and ops stakeholders to translate real workflow steps into Salesforce configuration, catching misalignments before they reached production.

Salesforce Developer & Administrator | **CloudAvengers** | *Remote* | Nov 2024 – Apr 2025

- Built and maintained custom data architecture across a client Salesforce org, designing objects and field relationships to support end-to-end business process tracking.
- Designed and delivered a reporting and dashboards layer that gave client stakeholders visibility into operational metrics, rebuilt iteratively as requirements evolved across sprint cycles.
- Implemented and tested platform automations using Flows and declarative tools within a two-week Agile sprint cadence.

Computer Technician | **Infinitech** | *Esquel, Chubut* | Jun 2017 – Aug 2021

- Diagnosed and resolved hardware and software issues across a high-volume client base over four years, working from root cause identification to delivery with no escalation path available.
- Served as primary technical contact for walk-in clients, translating technical problems into plain-language explanations and tracking every issue from intake to resolution.

EDUCATION

Salesforce Developer Bootcamp — 800+ hours | **Plataforma 5 – CloudGaia** | Feb – May 2023

Intensive hands-on training in Salesforce development and administration. Real client project delivery included.

Introductory Salesforce Course | **Plataforma 5 – CloudGaia** | Nov 2022 – Jan 2023

54 hours. Salesforce platform fundamentals and cloud-based CRM concepts.

LANGUAGES

Spanish: Native | **English:** B2 – Upper Intermediate
